

NextOS- Bridging the Gap Between Medical Mobility and Administration

Unified Communications for Healthcare

- Accelerate patient response time
- Reduce monthly expenses
- Empower mobile workers
- Increase billing accuracy
- Streamline communication
- Transition to the cloud and remain compliant

The Cloud Phone System of the Future – Today

With NextOS you will be able to improve patient satisfaction, streamline receptionist operations and increase caregiver flexibility.

- Make calls from any device, while your caller ID says you are “in the office”.
- Secure, facility and mobile communication.
- Manage incoming and outgoing messages, maintain up-to-date connection information and configure controls on calls and voicemail.

All of Your Business Communications – One Source

From voice to video, stay in touch with patients and colleagues whether you are in the office, at the facility, at home or on your mobile device and swap calls from one device to the next when you are on the move.

- Empower mobile workers to make calls from any device, anywhere.
- Reception console improves productivity for multi-site locations.
- Reduce response time to voicemails when they are recorded and emailed or texted to you.

Monitor Your Productivity from Anywhere

Gain the freedom that comes with cloud-based unified communications. So much more than a dial-tone, NextOS provides instant access to your practice lifeline.

- Online call log allows you to view records of all phone calls within your Nextiva Office Manager Control Panel. This allows for easy tracking of billing and appointments.
- In the rare case of disaster, calls will automatically be forwarded to back up number.
- Shared Line Appearance sends calls to all of your phones at the same time, never miss a call again!

Trusted by These Medical Professionals and Many More

Global, Redundant Platform

NextOS runs on the same platform trusted by 16 of the top 20 communications providers.

- The most innovative, secure and reliable infrastructure in the world.
- Supported by 150 expert telecommunications engineers 24/7/365.
- Failover redundancy with multiple points of presence across the U.S.

Amazing Service®
